SUMMARY

Nazar has 7+ years of programming and application development experience. Full Stack Developer with a strong focus on frontend development. Compatible team player throughout the complete project cycle, testing, and final implementation. Excellent communication and interpersonal skills. Quickly learns and masters new technologies. Top competencies are mastering Frontend technologies, alongside passionate about Backend, DevOps and Cloud computing technologies. An Angular and Nx monorepo enthusiast.

EDUCATION

MSc Computer Science August 2021
University of Konstanz, Germany

Bachelor of Information Systems June 2013
University of Civil Engineering, Azerbaijan

SKILLS

Languages & Frameworks: JavaScript, TypeScript, Java, Python, HTML, CSS, Bootstrap, Angular, Web Components, lit-html, NgRx, RxJS, SQL, PostgreSQL, Spring Boot, GraphQL

Tools & Technologies: Nx, AWS, GitLab, Docker, REST API, Camunda, Karma/Jasmine, CI/CD, Playwright, GitHub Actions

Libraries: WebSocket API, Socket.IO

Software Development: Agile methodologies (Jira, Scrum, Confluence), Unit Testing, E2E Testing, Code Reviews

WORK EXPERIENCE

Software Developer May 2025 – November 2025
CompuGroup Medical SE & Co. KGaA, Germany

- Design and implement new software components for a complex ERP SaaS based mainly on SpringBoot, Java, TypeScript and Angular.

- Close collaboration with product management and quality assurance.
- Implement modern front-end solutions based on Angular – from conception to implementation as well as migrating old AngularJs 2.0 components into new Angular v20.
- Debugged rendering issues and improved REST interface responses.
- Regularly participated in peer reviews within the team.
- Implemented end-to-end tests with Playwright.

Technical Consultant

December 2021 – April 2025

NTT DATA DACH, Germany

- Enhanced CRM system architecture, contributing to frontend with implementing new functionalities and optimizing in Angular and TypeScript.
- Initiated adoption of Nx to reduce build and test times both locally and in CI/CD pipelines by using Nx computation caching technology.
- Also helped to reduce our build time over 50% by eliminating circular dependencies, dead code and legacy code.
- Took a part in a large-scale customer information hub, spearheading backend development with Java, SQL, PostgreSQL, and employing testing frameworks such as JUnit and Mockito.
- Engaged in Agile development, including sprint reviews and retrospective meetings.
- Developed business logic, documented inline code, and performed unit and E2E tests.
- Designed and implemented Docker-based container orchestration, in order to improve scalability and resource utilization of the web application.
- Developed impactful showcases, led presentations for acceptance, and effectively demonstrated task solutions during Sprint Reviews.
- Conducted code reviews, migrating to new Angular version, implementing CI/CD processes.

Frontend developer

July 2015 – March 2017

DreamArt Creative Agency

- Built and optimized a startup webpage using HTML, CSS, JavaScript, and jQuery.
- Collaborated with UX/UI designers to refine business logic and enhance user management processes.
- Debugged rendering issues and improved REST interface responses.

IT support technician

March 2012 – June 2013

Caspel LLC

- Delivered technical support for computer systems, hardware, and software.
- Maintained internal network infrastructure, including servers, routers, and switches.

CERTIFICATES

Microsoft® Certified Technology

Specialist: Windows Server Active Directory, Configuration.
